DETAILED ACTION

Election/Restrictions

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, and 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "said housing(s), said air distribution system" in line 4/5, "said electrical heater" in line 6, "said internal construction" in line 7, "said inlet cavity and said orifice chamber(s) in line 8/9. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the axial length of said housing" in ***. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoffman, Jr. et al. (US 5937535).

Hoffman Jr. et al. discloses a forced air drying unit comprising a housing, an inlet cavity, a baffle, air passages, a single or multiple orifice chamber, and a series of orifices allowing air to pass from said orifice chamber to the exterior of the housing, an electrical cartridge heater mounted within the housing, and having a means for controlling the temperature of the material comprising thermocouple.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Van Denend (US 4756091) discloses a drying device similar to applicant's invention.
